borrow with a Safe Health Factor

TYDRO LEVERAGED TRADING

Leveraged Trading with Borrowed Assets - Buying Mavrk Deployed Tokens

The screenshots illustrate the steps of leveraged trading:

- Step 1: Initial Screen**
Shows the main trading interface with "TRADE MAVRK TOKENS" at the top. It includes "Buy Tokens" and "Sell Tokens" buttons, and tabs for "USDTO" and "kBTC". A "Tydro" token card is visible.
- Step 2: Sell USDTO**
Shows the "Sell" section where 15 USDTO are being sold for \$15.00. The "Buy" section shows 7540532.1 TYDRO tokens purchased for \$14.63. The "Transaction Details" overlay shows the swap from 15 USDTO to 7540532.1 TYDRO.
- Step 3: Approve & Swap**
Shows the "Approve USDTO for swap" and "Swap USDTO to TYDRO" buttons.
- Step 4: Holdings Overview**
Shows the "TYDRO LEVERAGED TRADING" screen with a total portfolio value of \$226.41. The "Holdings" section lists various assets and their values.

Click on the Trade button to use your borrowed USDTO or kBTC to buy tokens deployed on Mavrk

Enter the amount of USDTO or kBTC you wish to trade for your selected token

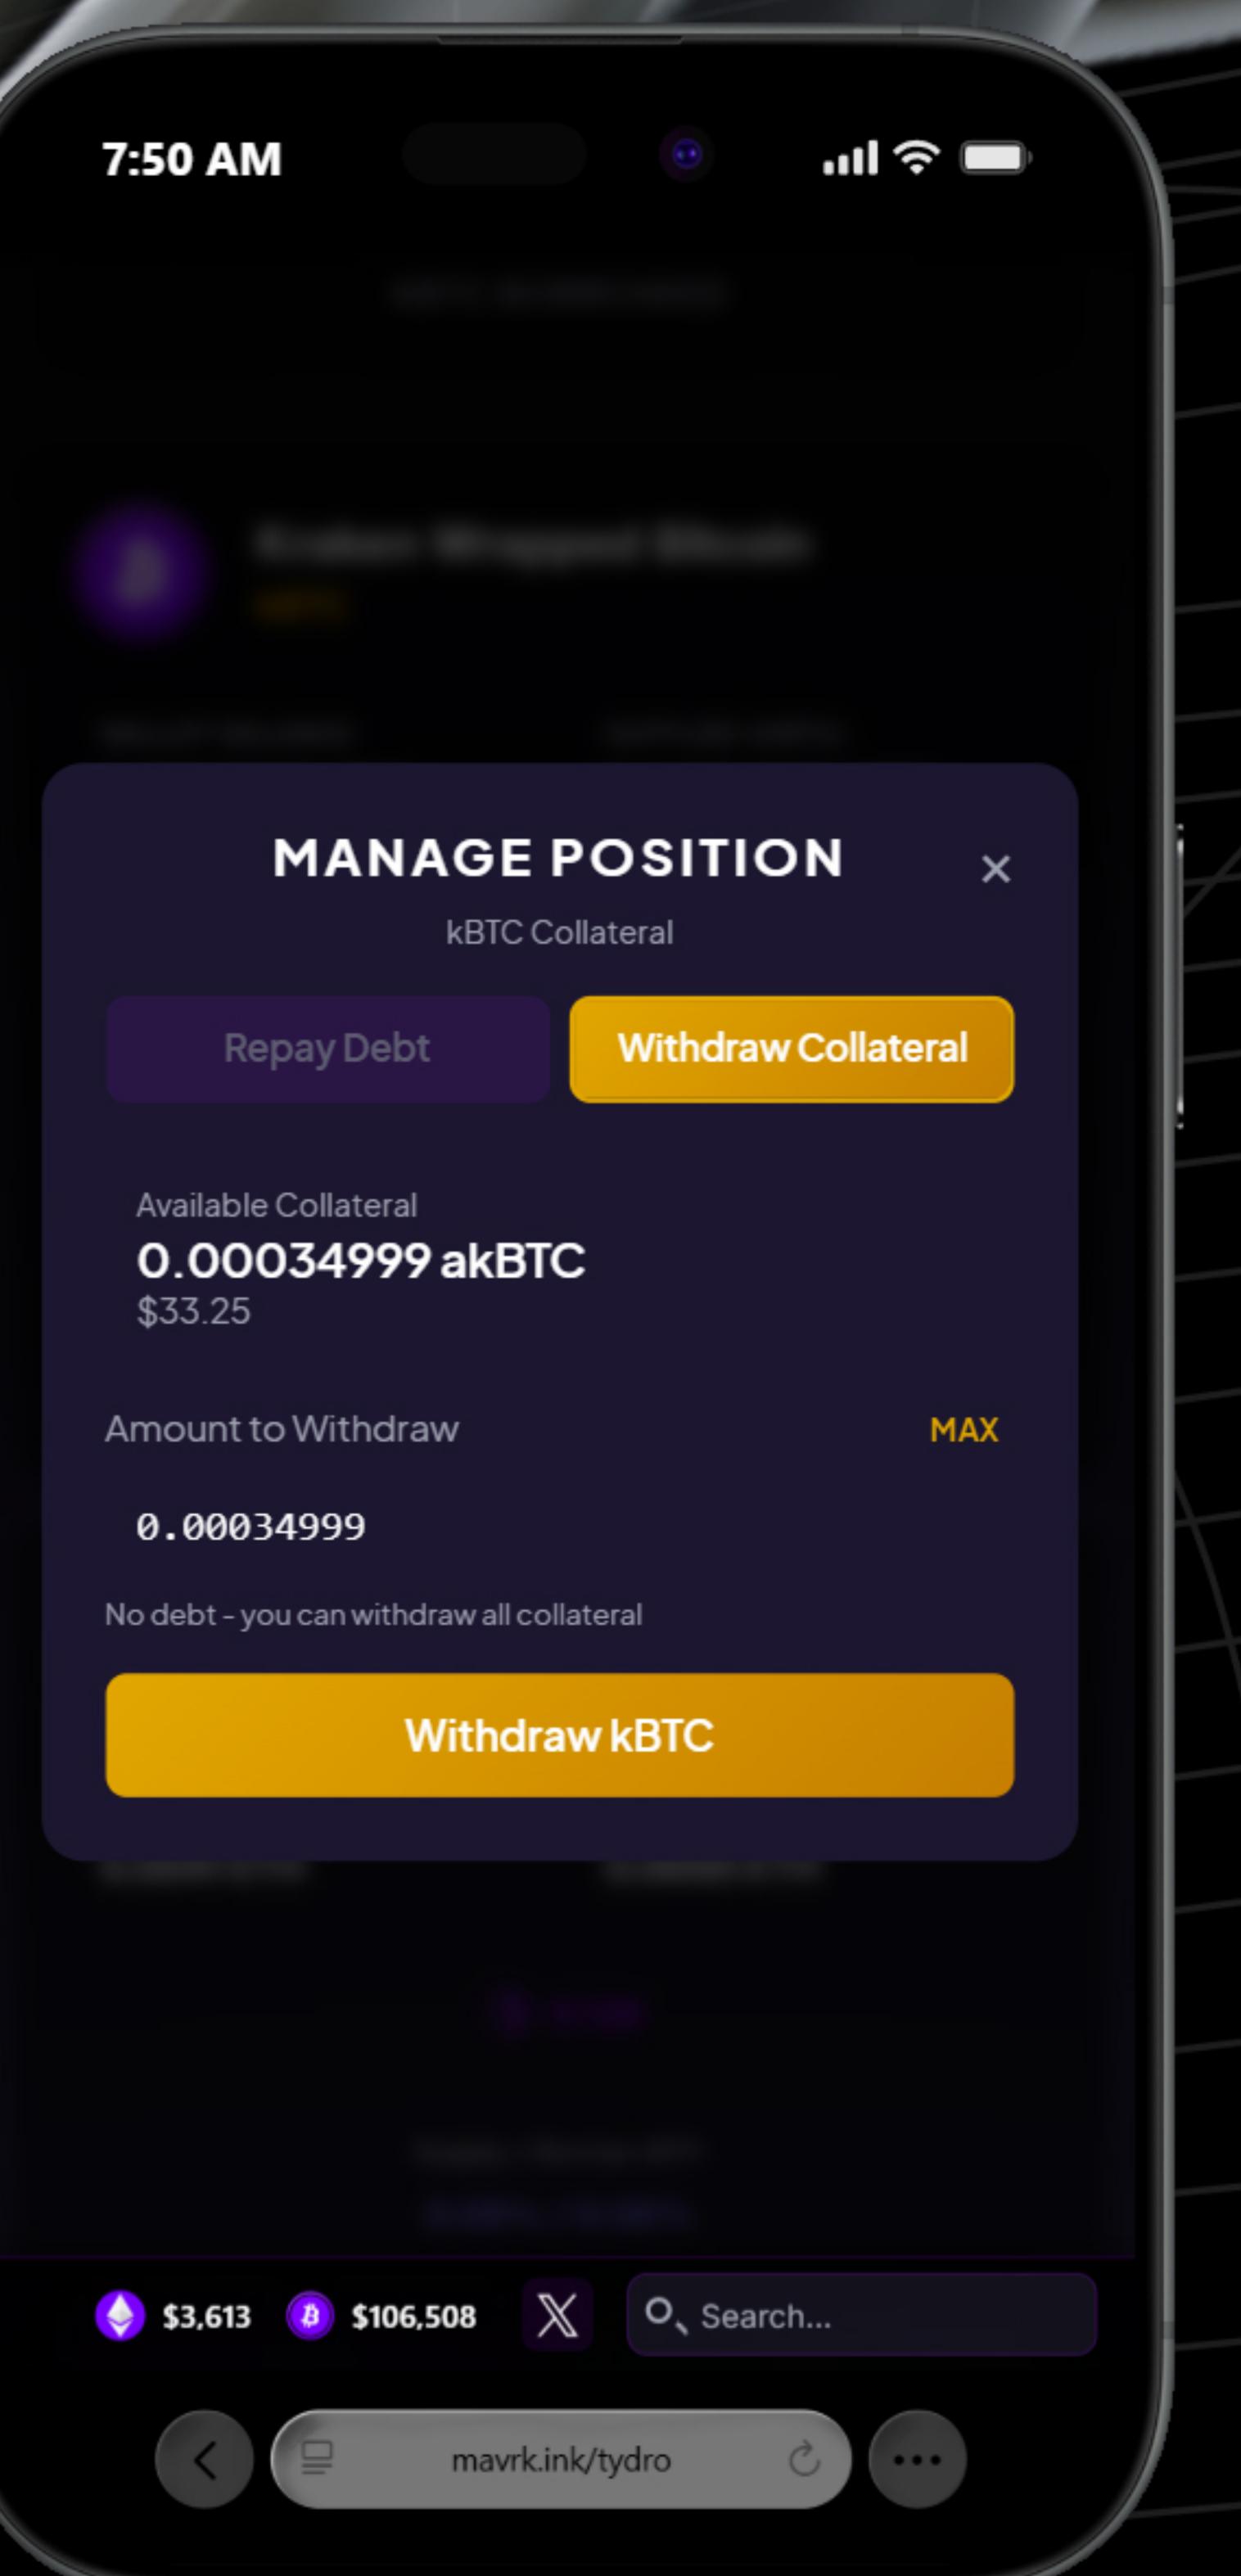

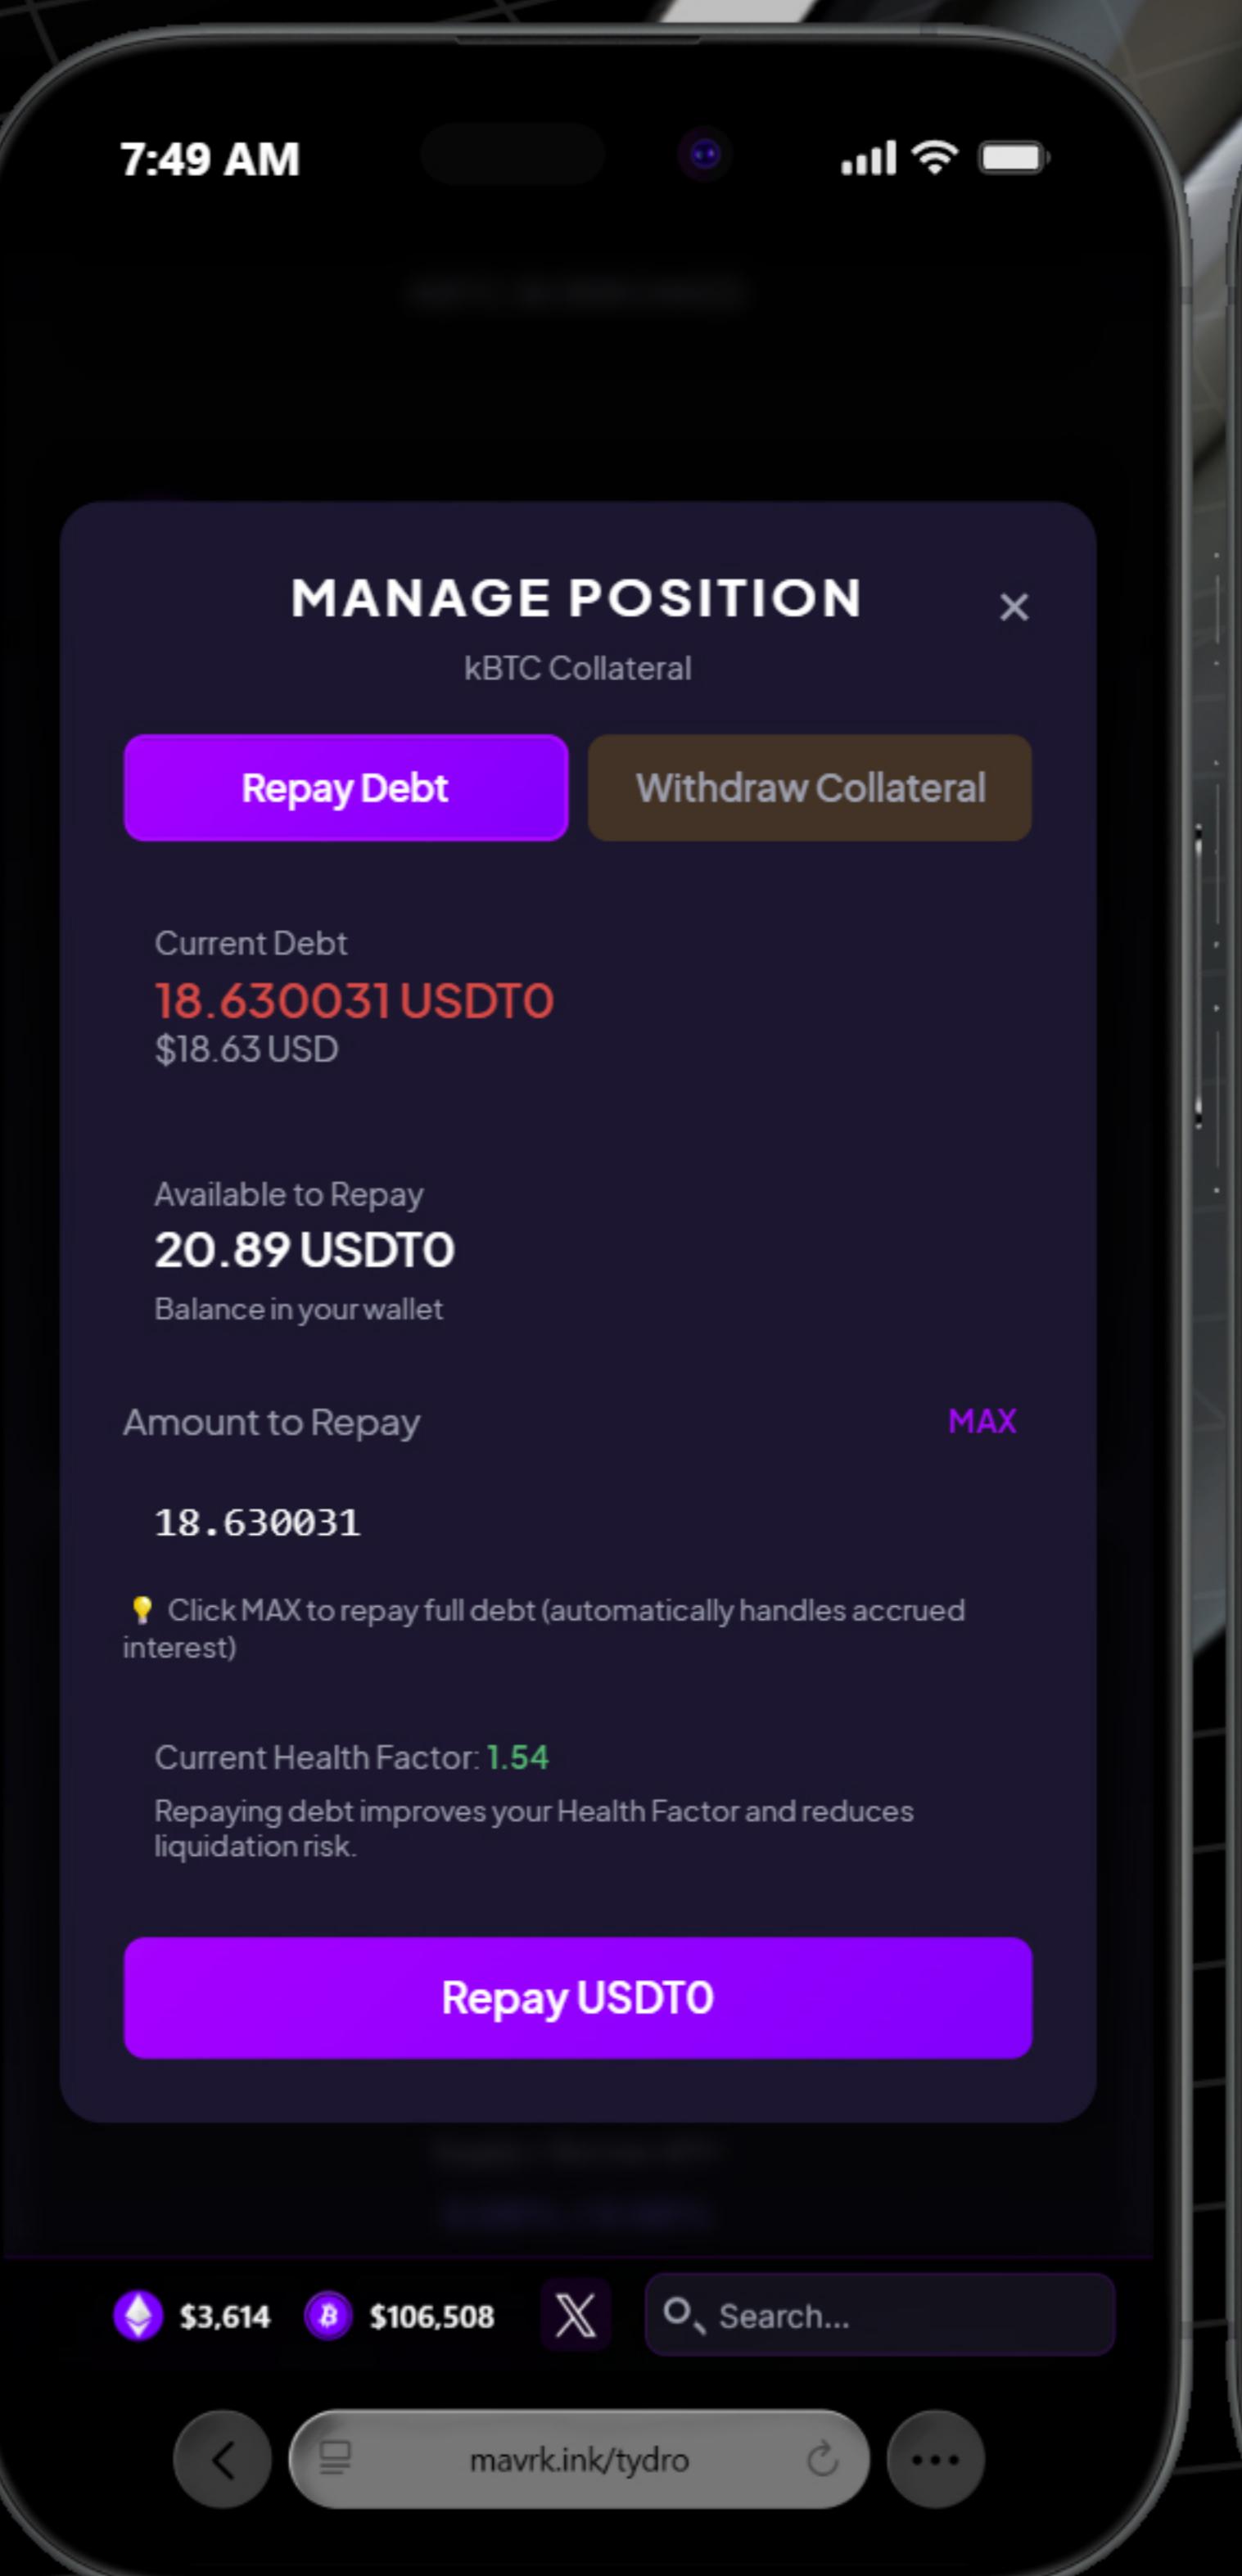

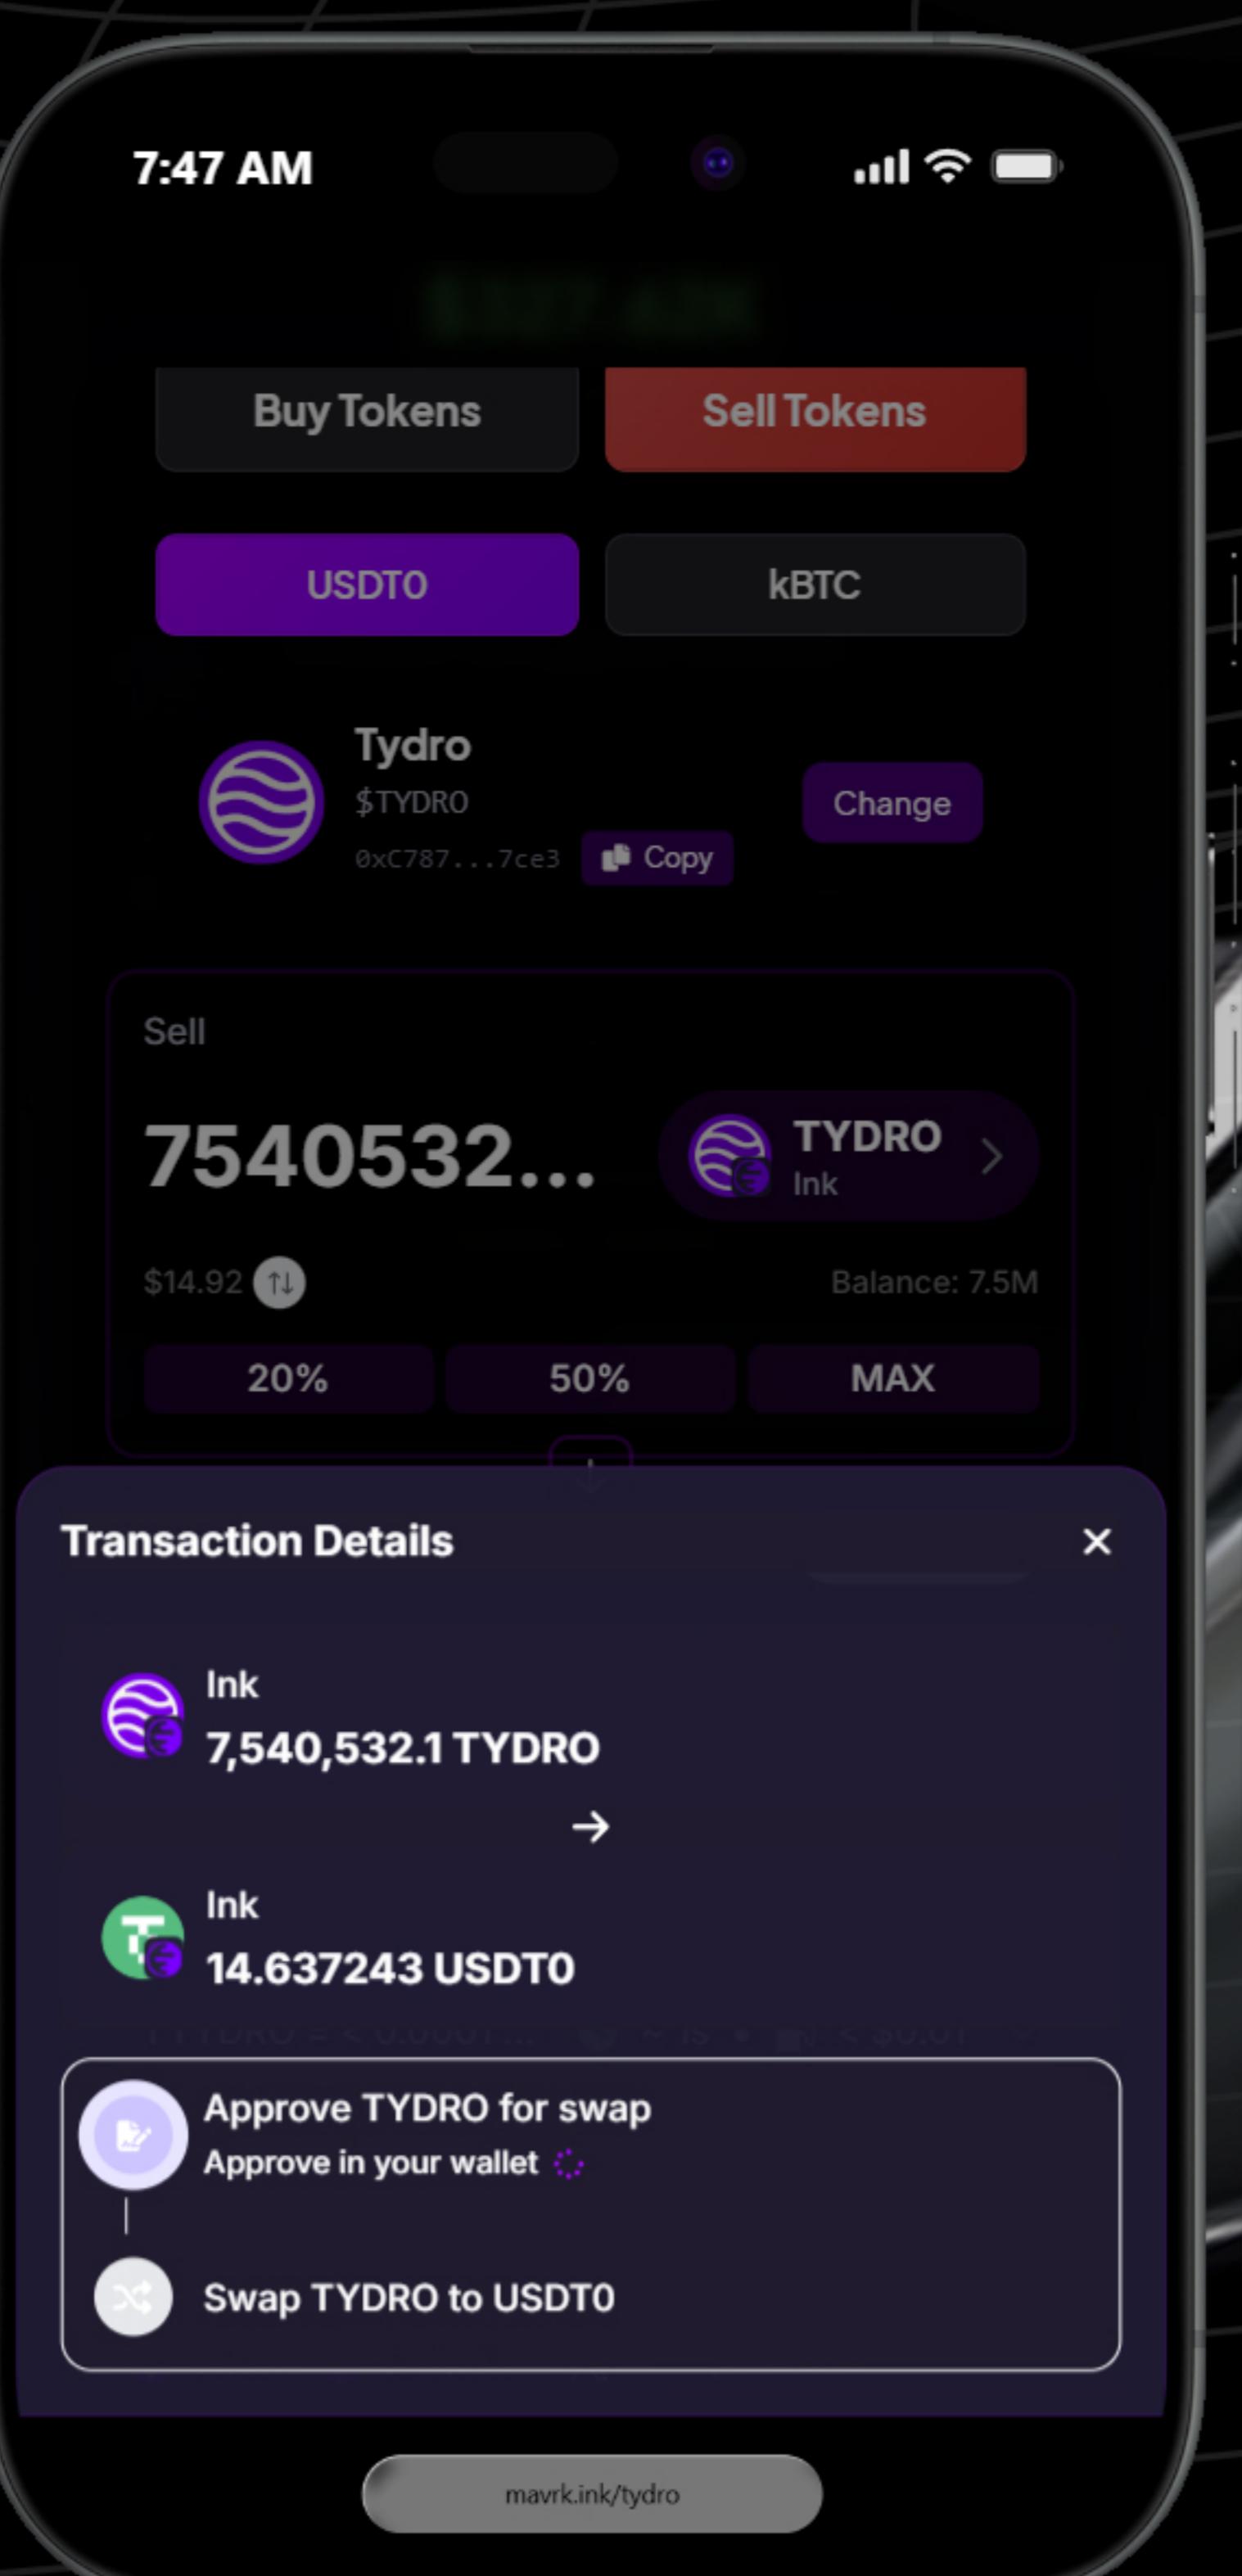

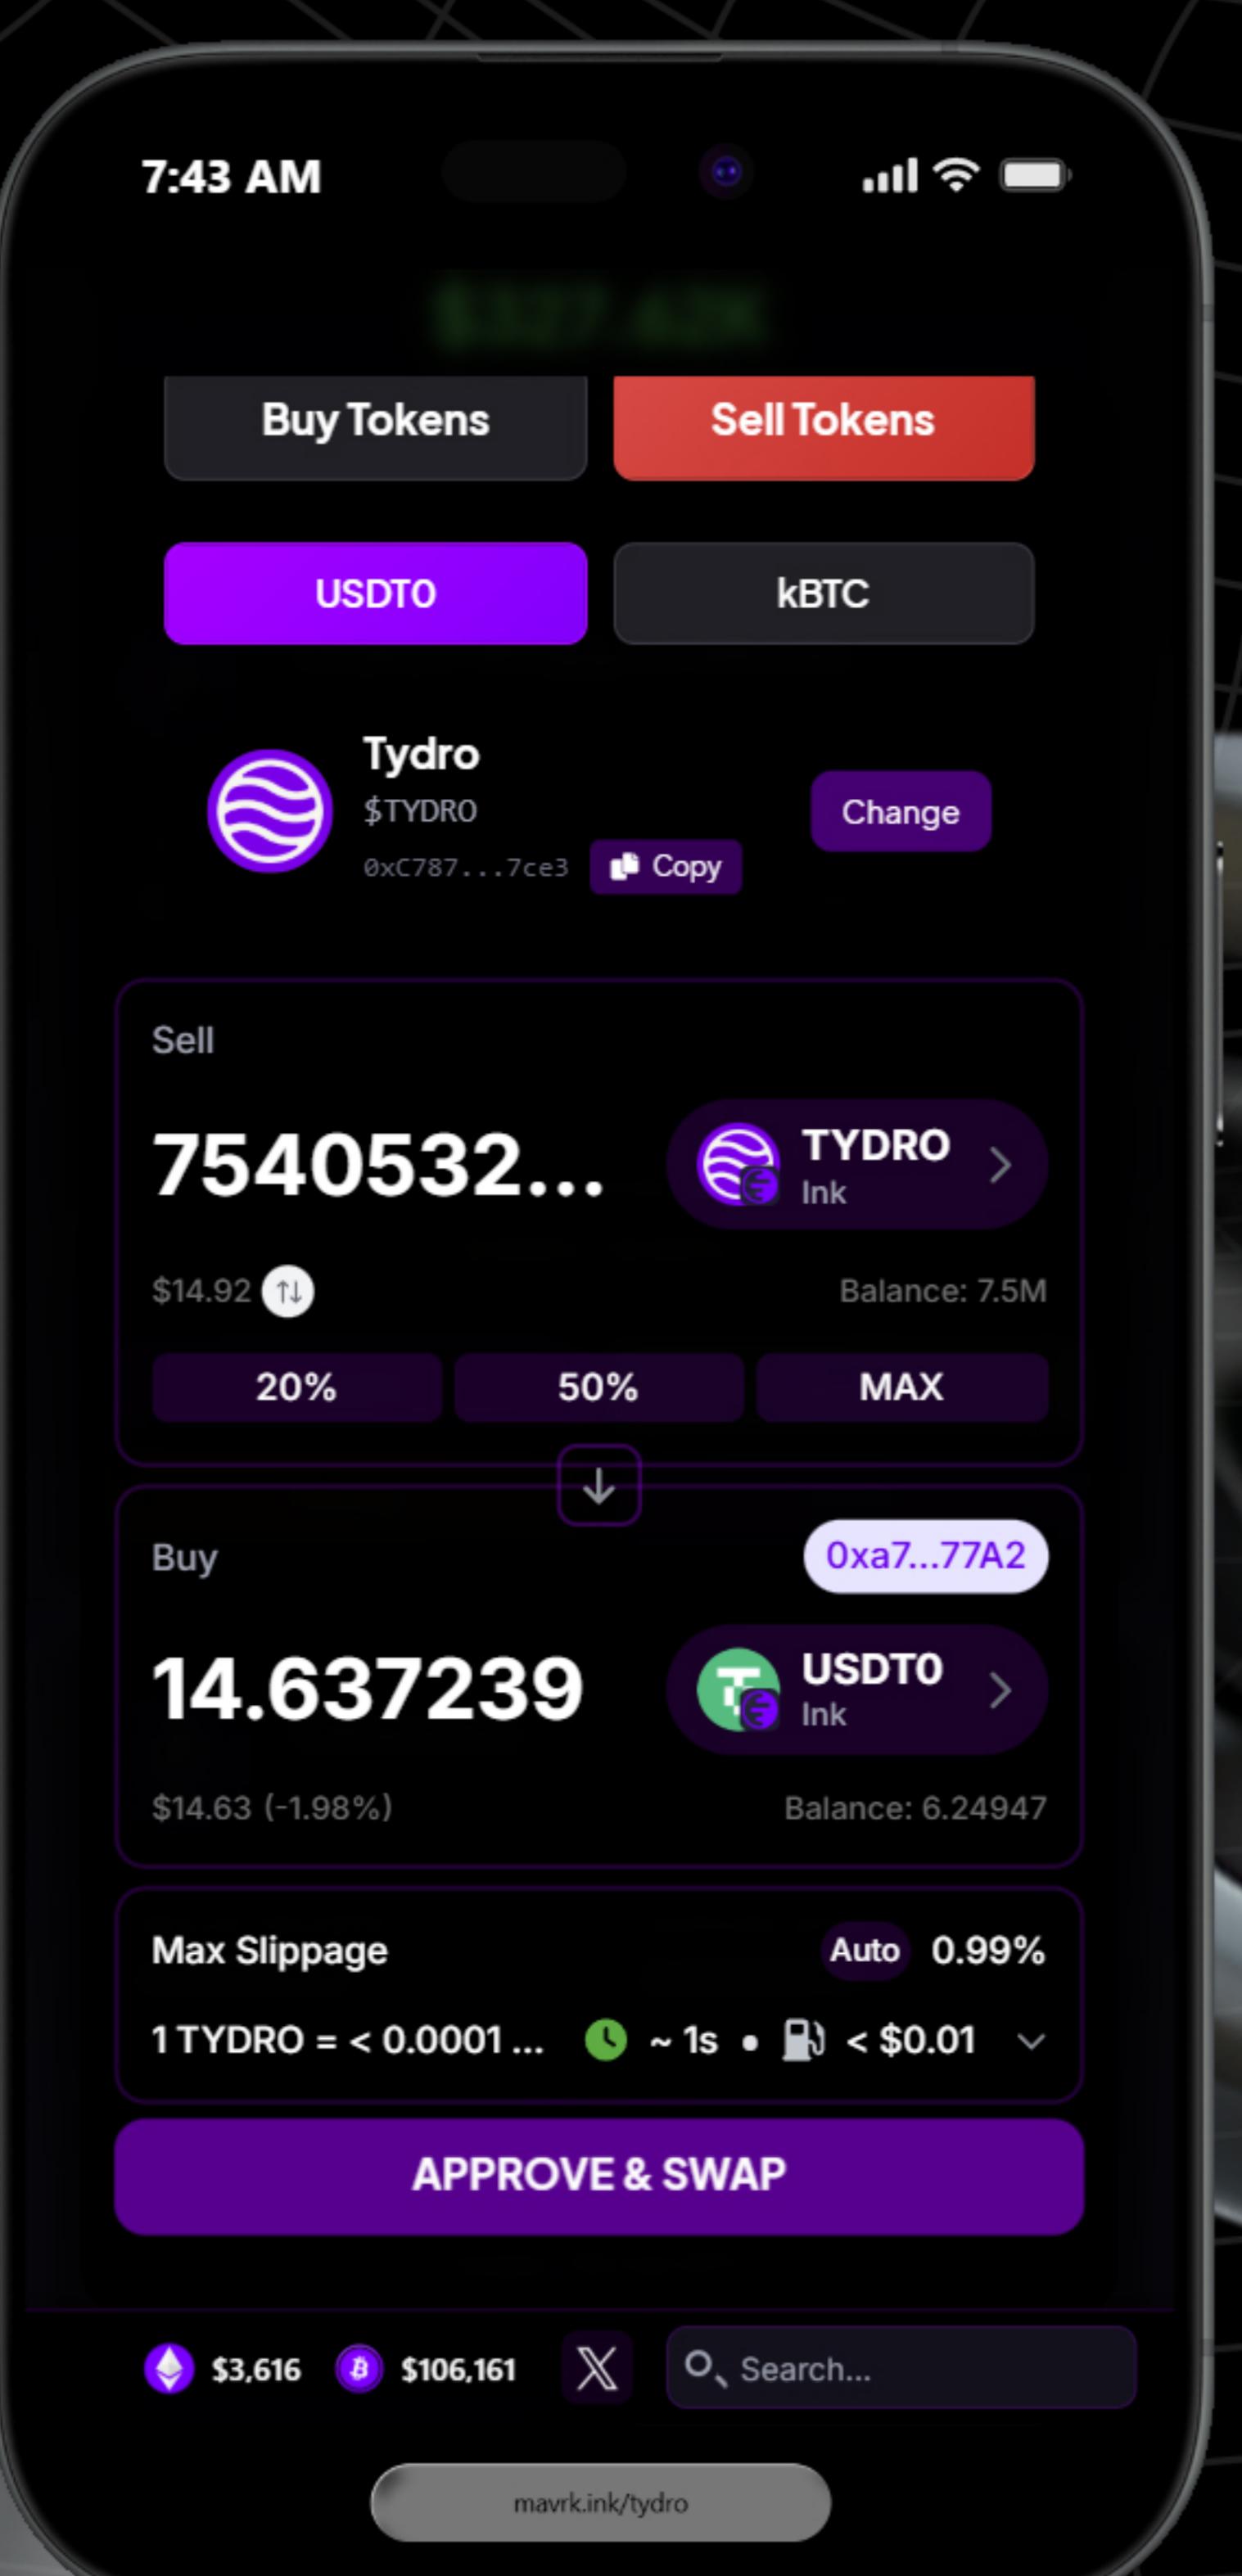

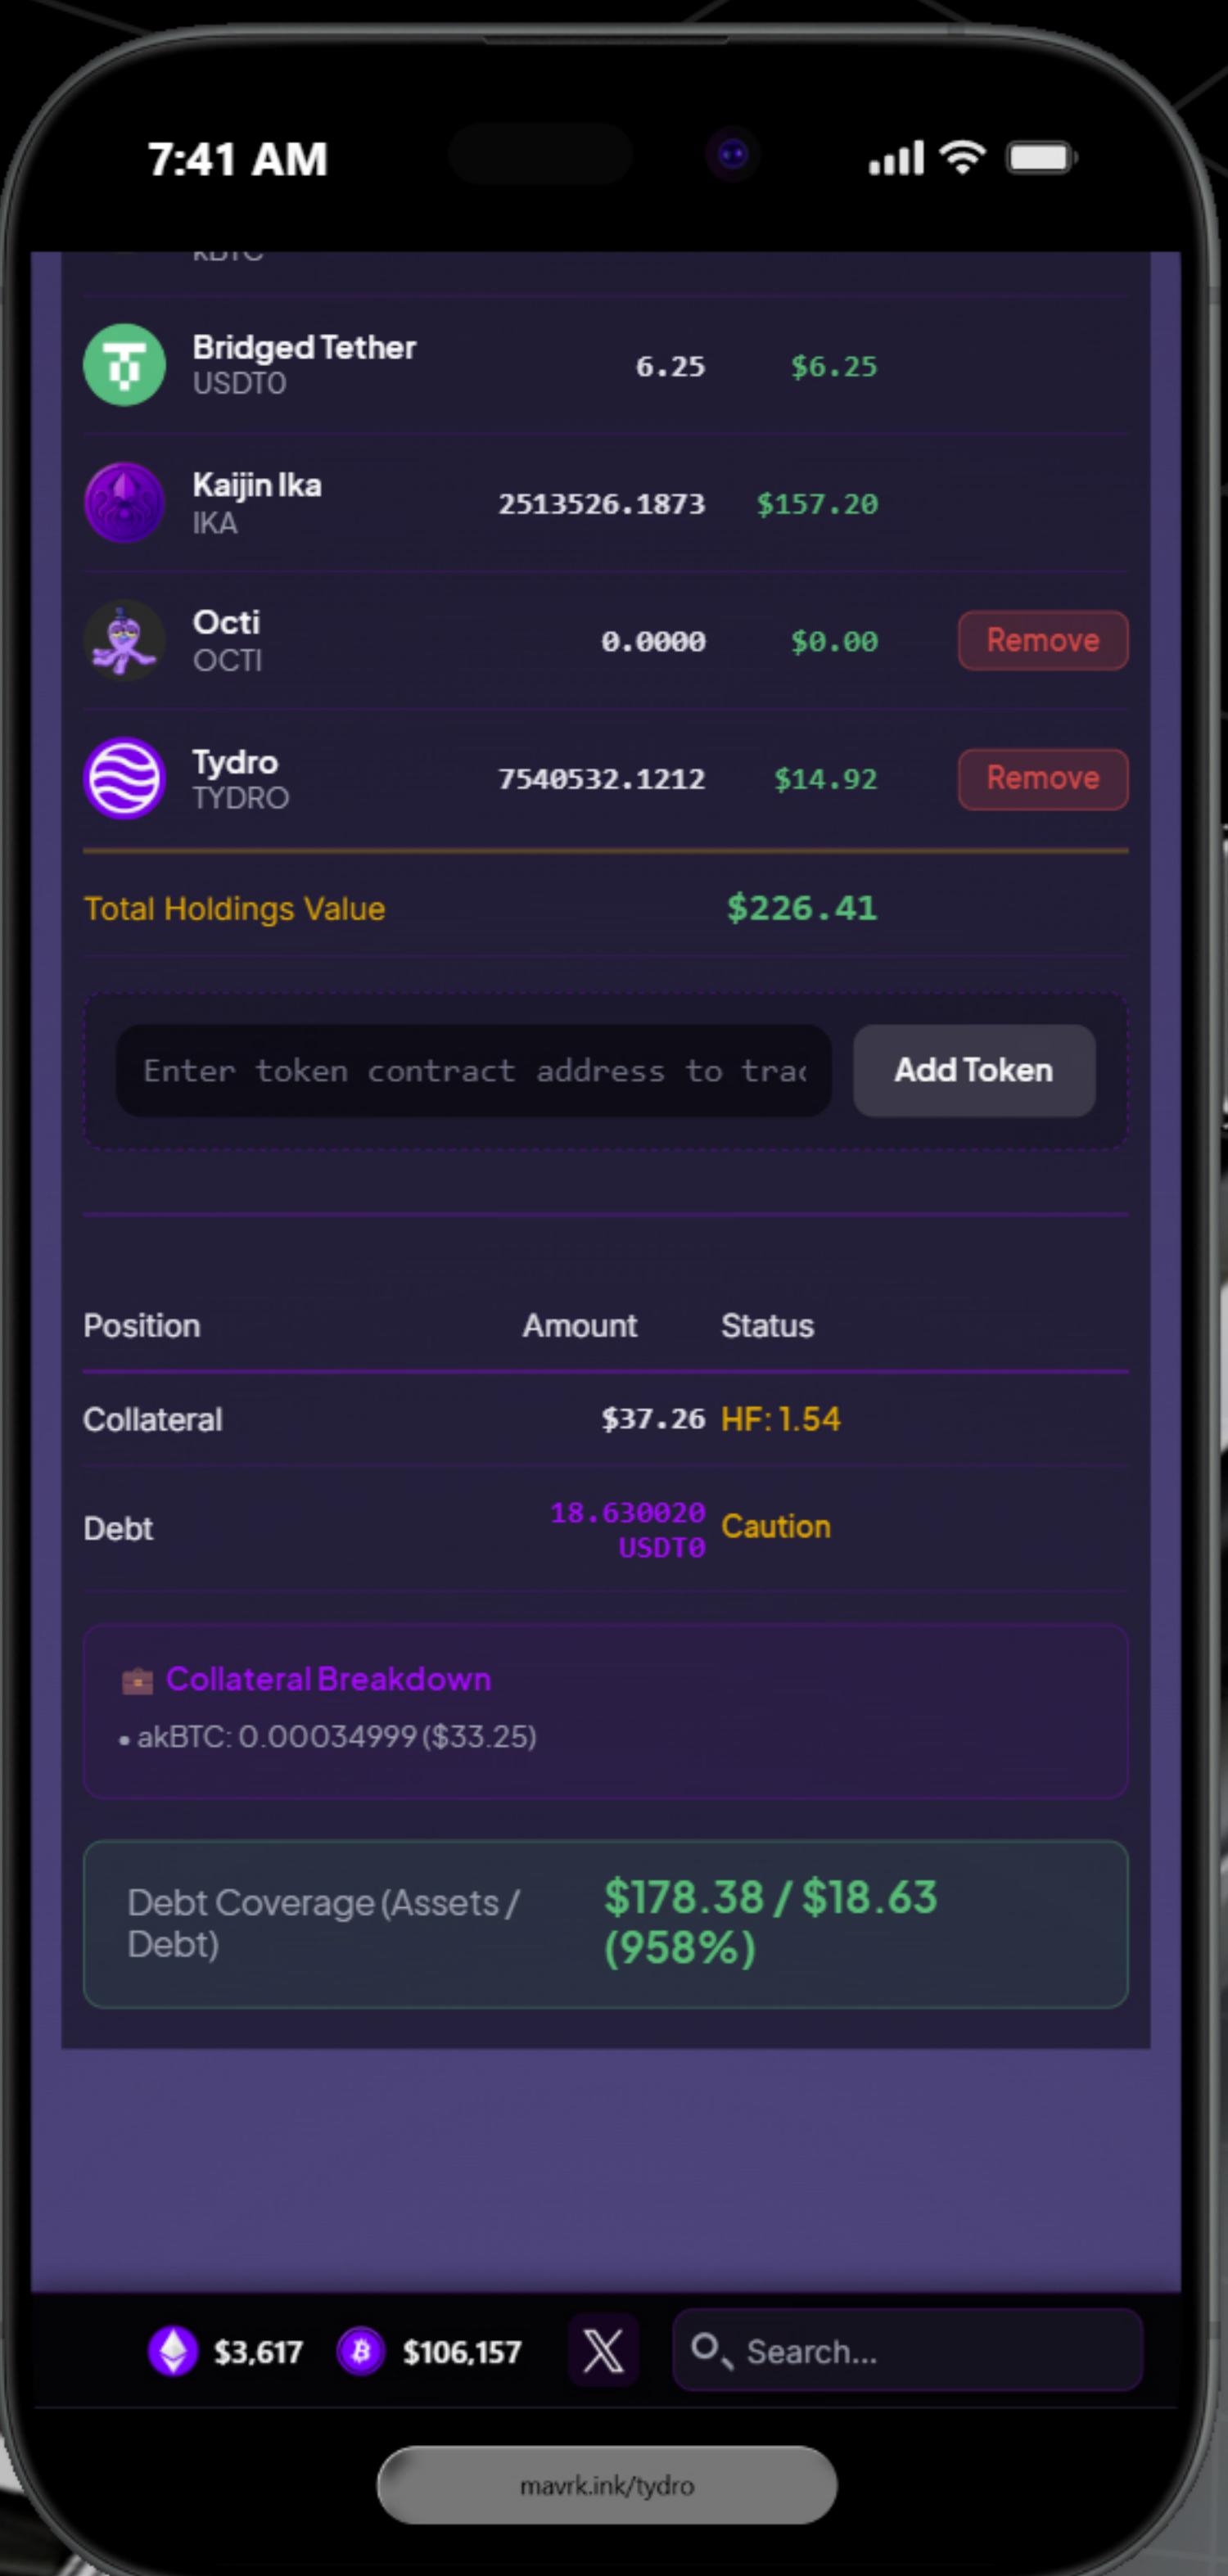

Submit your transaction.
Approve USDTO or kBTC for spending and Swap for your selected token

View your updated holdings.
Add your newly purchased token to your holdings section to track its value in real time.

TYDRO LEVERAGED TRADING

Leveraged Trading with Borrowed Assets - Managing, Repaying Debt, and Withdrwaing Assets

Below the holdings section, you can view our Debt to Asset ratio. This is a sum of Token Holdings + USDT0 in your Tydro Leveraged Trading holdings.

Enter the amount of your selected token you wish to trade for USDT0 or kBTC

Submit your transaction. Approve your selected token for spending and Swap for USDT0 or kBTC

You can either continue to trade tokens, or click on the Manage button in order to repay your current debt.

After repaying your borrowed debt, click Withdraw Collateral to withdraw your deposited assets.
